Bridgetown, Ohio, a town located in the heart of the coal mining region, has a reputation for being one of the most dangerous places in America. The town is notorious for its high incidence of lung cancer, caused by the inhalation of coal dust.

Helen Stumpf, a local resident, was recently diagnosed with lung cancer and is preparing to undergo chemotherapy.

The town is currently under investigation by the Occupational Safety and Health Administration (OSHA), which will determine if the town's working conditions are in compliance with federal laws.

Legislation to provide workers with more protection is expected to be introduced in the upcoming legislative session.

Happiest and Buzziest City of Mexico.

Wishing to be home in time for the annual December 16th fiesta, a large number of American tourists and Mexican families are checking out of the palatial hotel in the city of Mexico.

Said one young woman who had been away for six months, "I never thought I would miss home so much until I got here."

Another traveler, a man in his late forties, said, "I can't believe how much things have changed here in just a few months. It's like a completely different country."

Yet another, a young couple, remarked, "We've had a wonderful time, but it's time to go home. We can't wait to see our family again."

This never-ending stream of people, all with their own stories and reasons for leaving, forms a colorful tapestry that is Mexico. Each one adds to the vibrant fabric of the city, making it one of the happiest and most buzzy places on the planet.

"The Rich New Yorker"

By ROSE MEREDITH

(London) LUCILIA PRATIGE was coming after her long lay-off in New York City. She had been living with her mother's cousin, Mrs. Pettry, a rich and fashionable woman, who had offered to add the finishing touch to Lucilia's social ambitions by sending her to a famous private school. Lucilia did not expect her to communicate with the young people of her own class, for the idea that she was a pupil of the great Blanikoff brought many requests for auditions from no less no

"Goodness, I will be a rich woman,"

signed Lucilia as she related it to the Denver Post's Helen Douglas. Lucilia was an American student, and the blanikoff was a great socialite in the city of the Brontës. Lucilia had won a scholarship at her husband's expense, and the school was not only a luxury, but a necessity. Lucilia was a young woman of the rich, and she had come to New York to study in the most modern music. Lucilia was one of the most famous singers, and her voice was like a choral song, with a delicate sweetness and a graceful skill. Hail Storm Plays Havoc Near Arcanum

Corn and Tobacco Are Damaged by Big Storm That Hits Misses Around Arcanum and Pitsburg Friday Evening—Chautauqua Grounds At Arcanum Flooded.

(Grosvenor Advocate.)

A large section of the country around Arcanum, and to a point six miles east of Pitsburg, was visited by a severe hail and rain storm about 4 o’clock Friday afternoon, and a vast amount of damage done to the crops of corn and tobacco.

This thing was cut to pieces in many fields, while the tobacco was rotted under heaps and buried into the ground. The hail was followed by a terrific description of rain, resembling thunder and lightning, and the section was soon under water.

At Arcanum the Chautauqua tent was damaged by the storm, and the grounds flooded to such an extent that they were unfit to use Friday night and the evening program was transferred to the auditorium of the high school.

The rain of Friday evening seemed to cover a wide territory. At Minie mills, where the Delaware county fair was in progress, the grounds were flooded in places as deeply as in Arcanum, and were in four feet of water at places when the rain was over, for several hours after the rain.

Increase in Demand for Higher Education

Registration to 6000 colleges, universities, and professional schools of the United States increased nearly six times a century ago as in population in the 44 years from 1894 to 1938. From 123,500 the number of students in these institutions increased to 730,000 in 1938, a growth of 475 per cent, as shown by statistics compiled by the interior department, bureau of education. During the same period enrollment in secondary schools increased 801 per cent, about 12 times as rapidly as general population, which increased 76 per cent during this time.

Corresponding increase appears in teaching personnel. The number of professors and teachers in colleges, universities, and professional schools of the country, exclusive of institutes engaged in preparatory departments, increased during this time from 10,752 to 35,000.
