THE CARE AND PROPER USE OF FINE LINENS

ARTICLE III

Preserving Linens for Long Life

Like all other articles in the world, and often has been handled in a manner which is directly responsible for its condition. It is obvious, therefore, that the proper treatment of any material, whether it be the finest linen or the cheapest, is essential in order to make it possible to keep it in good condition. This is true not only of the linen itself, but also of the clothes which are made of it.

It is necessary to see that the material is kept as clean as possible, and that it is not exposed to any conditions which might cause it to become soiled or discolored.
